DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a recording medium playback device, classified in class 369, subclass 197.
 - II. Claim 7, drawn to the positioning of a recording medium inside a recording medium playback device, classified in class 369, subclass 30.8.
2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I addresses the miniaturization of a recording medium playback device so it may be inserted into a standard dashboard opening of a vehicle and Invention II focuses on the proper positioning of a recording medium inside the playback device. The subcombination has separate utility such as a stopper portion for abutting against an outer circumferential edge of the recording medium loaded by the recording medium loading means.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2653

4. A telephone call was made to Mr. Darryl Mexic at 202-293-7060 on Monday, September 22, 2003, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
